**Bio** - Mr. Ross offers extensive knowledge and proficiency in central plant operations as well as start-up and commissioning activities. His twenty plus years of experience has focused on these disciplines from diverse market sectors to include construction, engineering, owner's representative, and as an active and decorated member the US Military.

In addition to being responsible for ship propulsion and auxiliary systems for the Merchant Marines, Mr. Ross's experience in the private sector includes central utility plants producing 600 to 60,000-tons of chilled water, 5,000 to 1,000,000-pph of steam, and 250-kw to 100-mw of electric generation. Beyond his role in start-up and commissioning activities, Green utilizes his vast experience for trouble shooting operational and control issues, developing standard operating procedures, and performing plant condition assessments for our customers.
