

Chief Financial Officer

Peggy DeLetis

Green Contracting employee since 1999 with over 30 years of construction and 40 years of accounting experience.

Monmouth College

Bachelor of Science – Accounting

Bio – Ms. DeLetis joined Green Contracting in 1999 in the role of Controller. She was brought in to join the management team as the Company ownership was transitioning to become the 100% Employee Owned organization it remains today.

She was tasked with full responsibility of the accounting department from day one as the previous owners began immediate withdrawal from daily responsibilities. Her previous experience with cost accounting, cash management, controls, and budgeting provided the opportunity to modernize all areas of financial recording and reporting. Working closely with the Chief Estimator and Project Executive, she was able to streamline the estimate hand-off to project management and the construction team. With her attention to detail, Peggy also developed a process to improve the project budgeting function, leading to enhanced management and status reporting of work in process.

Upon her arrival, she was also given the responsibility of company-wide IT oversight and leading the transition to electronic communication and information processing. In addition to various software implementations, she also managed the network infrastructure as the Company grew.

As Ms. DeLetis took on the responsibilities of Chief Financial Officer, she was instrumental in the controlled growth of Green. She earned a seat on the Board of Directors with the additional Secretary and Treasurer duties. Also, within her purview is administrative, legal and regulatory compliance, including that of Human Resources, Employee Benefits, and Risk Management. She continues with her accounting oversight as she imparts knowledge on her eventual successors through a strategic continuity plan. She is mentoring and coaching future leaders to support company operations with efficiency and fiscal responsibility.
